Arnaud. C Azenui

Pembroke, NC | arnaudchenuiazenui@gmail.com | (325)-283-8217

EDUCATION

University Of North Carolina at Pembroke Carolina **Pembroke, NC**

B.S. in Computer Science | Cyber Security concentration | GPA : 3.96/4.0 May 2027

- Related Coursework: Algorithms and Java Programming, algebra, Calculus, Object-Oriented Programming.

Abilene Christian University B.S. in Computer Science | Abilene, Texas

B.S. in Computer Science | Cyber Security concentration |GPA:4.0/4.0 Transferred, December 2024

- Related Coursework: Computer Organization &Programming, Machine Learning, Artificial Intelligence.

WORK EXPERIENCE/INTERNSHIPS

Research assistant at UNCP, Pembroke, NC **Sept 2025 – Present**

- Research risk factors, governance frameworks, and internal control mechanisms related to self-driving network security.
- Evaluate instructional material for clarity, accuracy, and compliance with course objectives, ensuring audit-ready resources.

Seasonal Program Support, World Strides, Georgetown **May 2025 – July 2025**

- Monitored and maintained program databases ensuring accuracy, compliance, and audit readiness.
- Conducted internal control checks on participant records, improving compliance accuracy by 15%.
- Troubleshot hardware and software issues to prevent disruptions during hands-on technology and career exploration activities.
- Supported virtual and hybrid program components by managing Zoom sessions, assisting with screen sharing, breakout room coordination, and technical onboarding for guest speakers.

UX/UI Design Intern | The Sustainable Living Guide **May 2025 – Sept 2025**

- Conducted design audits and produced reports, improving documentation consistency and process auditability.
- Applied risk-based thinking to digital workflows, ensuring compliance with privacy and accessibility standards.
- Developed interactive wireframes and high-fidelity mockups aligned with stakeholder goals and user needs.

Research assistant at ACU, Abilene, Texas **Sept 2023 - Dec 2023**

- Identified key factors influencing student success and retention, leading to targeted strategies that improved retention rates.
- Developed predictive models that provided actionable insights, empowering university administrators to make informed decisions regarding student support services and academic programs.
- Support ongoing design audits and contribute to style guide documentation for consistency and scalability in the design system.

Certificate and Skills

- Audit & Compliance: Risk Assessments, Internal Controls, Governance Processes
- Technical Tools: Excel, SQL, Python, Tableau, Java, C++
- Soft Skills: Analytical thinking, Communication, Problem-solving, Collaboration
- Certifications: ISC2 Certified in Cybersecurity (in progress), Amazon Junior Software Developer Certificate

Projects

- Built a small-scale Excel/Power BI dashboard to simulate an internal audit process for a sample dataset
- Personal Portfolio Website: Built an interactive personal site (HTML, CSS, JavaScript) to showcase projects, resume, and GitHub integrations. Optimized for mobile-first design and professional branding.
- Predictive Analytics for Student Success: Analyzed historical academic data to identify factors influencing student success and retention, developing predictive models to enhance retention strategies.
- Data Visualization Dashboard: Designed an interactive Tableau dashboard to visualize sales data, providing stakeholders with real-time insights and trend identification for informed decision-making.

Activities and Leadership

- Vice President- National Society of Black Engineers UNCP Chapter, UNCP Math club.
