Arnaud. C Azenui

Pembroke, NC | arnaudchenuiazenui@gmail.com | (325)-283-8217

EDUCATION

University Of North Carolina at Pembroke Carolina **Pembroke, NC**

B.S. in Computer Science | Cyber Security concentration | GPA : 3.96/4.0 May 2027

- Related Coursework: Algorithms and Java Programming, algebra, Calculus, Object-Oriented Programming.

Abilene Christian University B.S. in Computer Science | Abilene, Texas

B.S. in Computer Science | Cyber Security concentration |GPA:4.0/4.0 Transferred, December 2024

- Related Coursework: Computer Organization &Programming, Machine Learning, Artificial Intelligence.

WORK EXPERIENCE/INTERNSHIPS

Envision by WorldStrides **Georgetown, Washington, D.C.**

Seasonal Program Support **May 2025 – August 2025**

- Monitored and maintained program databases, ensuring accurate participant records, session attendance tracking, and compliance with privacy regulations.
- Configured laptops, tablets, and A/V systems for classroom simulations, ensuring seamless delivery of interactive STEM and leadership sessions.
- Troubleshot hardware and software issues to prevent disruptions during hands-on technology and career exploration activities.
- Supported virtual and hybrid program components by managing Zoom sessions, assisting with screen sharing, breakout room coordination, and technical onboarding for guest speakers.

UX/UI Design Intern | The Sustainable Living Guide **May 2025 – Present**

- Assist in building and refining web pages on Elementor (WordPress), ensuring consistent brand identity and optimized performance across devices.
- Conduct user research and usability testing to gather insights and improve user flows, leading to more impactful, purpose-driven design solutions.
- Develop interactive wireframes and high-fidelity mockups aligned with stakeholder goals and user needs.

Research assistant at ACU, Abilene, Texas **Sep 2023 - Dec 2023**

- Identified key factors influencing student success and retention, leading to targeted strategies that improved retention rates.
- Developed predictive models that provided actionable insights, empowering university administrators to make informed decisions regarding student support services and academic programs.
- Support ongoing design audits and contribute to style guide documentation for consistency and scalability in the design system.

Certificate and Skills

Amazon Junior Software Developer Professional Certificate, ISC2 Certified in Cybersecurity(in progress)

Java, C++, C, C# | Linux, Windows | PostgreSQL, SQLite, Python, HTML, CSS, JavaScript, Elementor, Figma, UI/UX Wireframing

Projects

- Personal Portfolio Website: Built an interactive personal site (HTML, CSS, JavaScript) to showcase projects, resume, and GitHub integrations. Optimized for mobile-first design and professional branding.
- Developed a 2-D game from scratch using Unity and coding in C#
- Used Java to create a calculator with a graphical user interface with the 5 basic mathematical operations.
- **Predictive Analytics for Student Success**: Analyzed historical academic data to identify factors influencing student success and retention, developing predictive models to enhance retention strategies.
- **Data Visualization Dashboard**: Designed an interactive Tableau dashboard to visualize sales data, providing stakeholders with real-time insights and trend identification for informed decision-making.

Activities and Leadership

- Vice President- National Society of Black Engineers UNCP Chapter, UNCP Math club.
