EDUCATION

University of North Carolina at Pembroke

Pembroke, NC

B.S. Computer Science, Cybersecurity Concentration

Expected May 2027

- GPA: 3.97 | Computer Science: Data Structures & Algorithms, Systems Administration, Networking, Cybersecurity
- Mathematics: Calculus I–III, Linear Algebra, Probability & Statistics, Discrete Mathematics

Abilene Christian University

Abilene, TX

B.S. Computer Science (transferred)

Dec 2023

- GPA: 4.00 | Coursework: Machine Learning, Artificial Intelligence, Computer Organization & Programming

TECHNICAL SKILLS

Languages: Java, Python (primary), C++, JavaScript, SQL, Bash — object-oriented design, data structures & algorithms, relational schema design

AI-Assisted & Agentic Development: agentic coding workflows end to end (specification, implementation, testing, debugging, documentation), LLM/agent evaluation and failure diagnosis, deterministic verification of AI-generated changes

Services & Infrastructure: REST API design & consumption, FastAPI microservices, Docker, Linux, Git & GitHub Actions (CI/CD), pytest, automated regression testing, MySQL & relational data modeling

Data & Analysis: NumPy, pandas, scikit-learn, PyTorch, time-series analysis, statistical estimation, cross-validation & error analysis

EXPERIENCE

Software Engineer — AI Benchmark Author & Reviewer | Handshake AI, Remote

Nov 2025 – Present

Build and review benchmark evaluations measuring frontier AI coding agents and models across concurrent programs spanning agentic software engineering, visual-reasoning bug fixing, and document-grounded knowledge work.

- Agentic software engineering (Project Dynamo):* Author 14+ Dockerized evaluation environments (Terminal-Bench 2 / Harbor) with deterministic verifiers, seeded data generators and SHA-256 input pinning; calibrate difficulty through repeated pass@k agent trials on GitHub Actions CI, iterating versions to hold solve rates inside a target band
- Testing against real product bugs (Project Jet):* Build tasks from real defects in open-source projects including pdf.js, plotly.js and seaborn, pairing behavioral fail-to-pass tests with up to 700+ pass-to-pass regression controls, validated by an oracle/no-op reward loop in sealed CI
- Debugging and production triage:* Built a reusable Python CI-artifact triage tool and diagnosed ~530 agent trials and ~180 CI bundles, separating genuine failures from harness, timeout and dependency faults by rebuilding environments natively
- Code review & engineering standards:* Final reviewer before tasks ship — 59 evidence-backed verdicts across 61 rounds and 14 technical domains, each independently reproduced by rebuilding the container and re-running verification; authored review playbooks and a shared rubric used across a distributed engineering team

Research Assistant — SDN & Network Security | University of North Carolina at Pembroke

Sept 2025 – Present

- Collect and analyze time-series network telemetry, engineering temporal features from raw flow records to detect anomalous traffic patterns in software-defined environments

Help Desk Support Technician | UNCP Division of IT, Pembroke, NC

Jan 2026 – Present

- Resolve hardware, software, and connectivity issues for students, faculty, and staff; escalate to Tier 2 staff

PROJECTS

Unmask AI — AI-Generated Media Detection — JavaScript, Python, ML APIs

2025

- Built and deployed a full-stack, user-facing platform that classifies uploaded media as authentic or AI-generated from model inference

Address & Location Data Enrichment Service — Python, REST APIs, Docker

2024

- Developed a containerized geocoding and data-normalization microservice; designed and consumed REST APIs for live data ingestion and enrichment

AI-Powered Data Quality Agent — Python, FastAPI, Pydantic

2024

- Built an automated validation pipeline auditing 100K+ records for missing fields, type errors, and inconsistent values, surfaced on a real-time error-reporting dashboard

LEADERSHIP & ACTIVITIES

Vice President, NSBE Chapter — UNCP | UNCP Math Club

2023 – Present

- Lead professional development programming for 40+ members and coordinate with industry partners
